AMANO

Time Guardian Hosted Software

Amano hosts your Time Guardian Online database so there is no software to install or network servers for your business to maintain. Your data is secure and protected with redundant back-ups in secure offsite data centers.

Employees can punch using a time clock, smart phone, PC or tablet. Manage your employees time from any location at any time.

Time Guardian Online includes complete ongoing support from Amano's technical service center eliminating any maintenance worries on you or your IT staff. Software upgrades and future product enhancements are included for the lifetime of your subscription. PC and MAC compatible. No long-term commitments.

Time Guardian hosted options

Amano offers optional, easy-to-use time clocks. Simply connect them via WiFi or ethernet, then enter the serial number in your Time Guardian online account. You can also have employees clock from any web browser on desktops, laptops, or phones.
